

# National Mobile Phlebotomy & Site Draw Program

## Supporting patient care through convenient in-home & site blood draws

We understand that many cancer patients feel anxious about visiting their doctor or lab, making it difficult to get the necessary blood draw for your cancer testing and care.

### **At NeoGenomics, patients come first. We're here to help.**

We proudly offer patients the option of site location or in-home blood draws through our national mobile phlebotomy program. Blood samples can be collected by a licensed phlebotomist in a comfortable, stress-free environment.

A physician's order is required to access our mobile phlebotomy services. You can request this service from your provider for liquid biopsy or blood-based testing.

At NeoGenomics, we understand that cancer testing can be overwhelming and stressful. Our dedicated team is here to help provide patient resources, facilitate mobile phlebotomy requests, and answer any questions you may have about testing.

All site location and mobile phlebotomy costs for NeoGenomics blood-based tests are covered by NeoGenomics and are at no cost to cancer patients.

1. Your provider requests mobile phlebotomy from NeoGenomics..
2. Our client services team will contact you to schedule an in-home blood draw or site location testing appointment that is convenient for you.
3. A licensed phlebotomist will visit your home and safely perform the blood draw.
4. The specimen will be sent to NeoGenomics for analysis. Test results will be delivered to your provider.

**This program is for NeoGenomics blood-based tests.**
